README.md ■ Getting started notes.md

```
# ---------- section 01 ----------
```

Getting started

```
import section_01
```

main Tabline theme section 01

README.md ■ Getting started notes.md

02 · Getting started

Using the theme

Load the theme and set your metadata in the preamble:

preamble.tex

```
\documentclass[aspectratio=169]{beamer}
\usetheme{Tabline}
\title{...}  \author{...}  \institute{...}  \date{\today}
% the tab bar shows the current section name
```

Start the document with `\titleframe` and compile with **XeLaTeX** twice.

03 · Getting started

Options at a glance

Flags

Pass as `\usetheme[...]{Tabline}`:

`nosectionpages`, `nocredit`

Special frames

`\titleframe` opens the talk.
`\thanksframe{..}{..}` closes it.
Section slides appear for every `\section`.

---------- section 02 ----------

Editor features

```
import section_02
```

main Tabline theme section 02

04 · Editor features

Code in the editor

- The tab bar follows your sections
- Line numbers run down the gutter
- The status bar holds the slide count

gradient_descent.py

```python
import numpy as np

def step(w, grad, lr=0.01):
    return w - lr * grad

for epoch in range(100):
    w = step(w, grad_fn(w))   # repeat
```

05 · Editor features

Editor panels

TERMINAL

```
$ pip install numpy scikit-learn
Successfully installed numpy scikit-learn
$ python train.py
epoch 10   loss 0.231
```

PROBLEMS

```
error shape mismatch: (64, 10) vs (64, 1)
warning learning rate looks high
info 3 tests passed
```

```
# ---------- section 03 ----------
```

Text and maths

```
import section_03
```

06 · Text and maths

Lists

- Items use the theme's bullet
  - Sub-items get a smaller marker
- Alerted text uses the alert colour
- Keep bullets short

1. Enumerate is styled too
2. One idea per slide
3. Let the figure talk

07 · Text and maths

Mathematics

Trapezoidal rule

$$\int_a^b f(x)\,dx \;\approx\; \frac{h}{2}\Big[f(x_0) + 2\sum_{i=1}^{n-1} f(x_i) + f(x_n)\Big]$$

Note

Maths keeps Computer Modern, which pairs well with the text fonts.

---------- section 04 ----------

Blocks and overlays

```
import section_04
```

08 · Blocks and overlays

Blocks

block
Beamer’s own block, restyled.

alertblock
For warnings and pitfalls.

exampleblock
For examples and tips.

09 · Blocks and overlays

Overlays work as usual

> First this

09 · Blocks and overlays

Overlays work as usual

> First this

> Then this

09 · Blocks and overlays

Overlays work as usual

> First this
> Then this
> And finally this

README.md ■ Tables and figures notes.md

```
# ---------- section 05 ----------
```

Tables and figures

```
import section_05
```

main Tabline theme section 05

10 · Tables and figures

A table

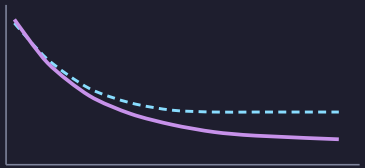

config	time (s)	memory (MB)	speed-up
small	31.3	457	2.8
medium	52.6	946	2.8
large	118.4	2505	3.6

Sample numbers for illustration.

11 · Tables and figures

A figure next to text

- Left column carries the story
- Right column holds the figure
- Use `onlytextwidth` to stay inside the margins

Sample curves: train and validation loss

README.md ■ Closing notes.md

---------- section 06 ----------

Closing

```
import section_06
```

main Tabline theme section 06

12 · Closing

Summary

1. Dark editor palette with purple, teal and coral syntax colours
2. Tab bar, line-number gutter and status bar on every slide
3. `codebox` and `pycode` for highlighted code
4. `panel` with `\termline`, `\errline` and friends
5. `\titleframe` and `\thanksframe`
